**Lab Goal:** This lab will use your knowledge about objects, loops, and if and while statements in a setting that requires you to check multiple things while moving.

Lab Description: For this lab assignment, you are to make a Jeroo move around the maze and collect flowers around the maze, also when the Jeroo runs into a net the Jeroo should use the flowers it has collected to get rid of the nets. The Jeroo should not fall into the water or the random nets, and should end the maze facing north.
